Semi-automatic Screw Capper LS-TSP series

Extra - Heavy-Duty models with push-button operation of bottle lift platform, to apply aluminium screw caps to glass bottles.

REFORM HEAD for Stelvin / MCA finish (applies 160 to 230kg pressure) for extra-secure sealing on bottle mouth.

A rotating head with four sprung rollers cuts a thread into the cap and forms it onto the bottle, including the tamper-evident strip at the base.

Easily adjustable for different bottle heights and diameters. Capping heads have a limited range of adjustment for different cap sizes, or heads may be interchanged to allow use of different bottle/cap combinations on one machine.

Suitable for products, including wines, carbonated drinks, in-bottle pasteurisation.

Operates on 220-250V 50hz supply and air at 6 bar.
Speed 400-500 bottles per hour.

Example prices:

Twin push-button model with 4-roll head	£4,250
Additional 4-roll head	£1,275
All-electric version additional	£250

Prices exclude delivery, commissioning and VAT
