EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

LA-20 'LEDA' semi-automatic labelling machine

22/10/16

ECONOMY labeller: compact, robust, bench-top machines capable of applying self-adhesive labels from a roll onto a variety of types and sizes of cylindrical container.

Applies single or wraparound labels, or front and back labels from the same roll, with options for clear plastic labels, bottles with a label recess. There is no date/lot printer option for this machine (but see [LA-21](#))

Speed approximately 500 bottles per hour, depending on label length and operator skill.
Standard machines: Single phase 220 – 250V, 50hZ.

Other details

Lift foam roller to insert bottle and trigger the mechanism. Bottles are rotated by a driven rubber roller. Label position easily adjustable

Labelling parameters controlled by PLC. Program memory for 19 different formats.

Standard machines take round bottles in the range 50mm to 120mm diameter

Standard label heights 15mm to 170mm.

Label winding spec: left-edge leading, inside wound, maximum diameter 200mm on 76mm cores.
