EXPERTS IN LIQUIDS PROCESSING FILTRATION AND BOTTLING

LSX series semi-automatic labelling machines

Compact, robust, bench-top machines capable of applying self-adhesive labels from a roll onto a variety of types and sizes of container.

Options for round, square or shaped bottles, wraparound labels, front and back labels from the same or separate rolls, date/lot-code printing, clear plastic labels, tall labels.

Orientation of labels front to back, or to reference mark, or to pre-applied label.

Speed around 600 bottles per hour, depending on label length and operator skill.

Standard machines: single phase 220-250V / 60hz , 200W. Compressed air supply needed for date printer.

LSXE: Economy version

LSXD: Double roll version

LSXT: Standard version
(shown with printer)
